STYROPAPA

Płyty styropianowe laminowane papą podkładową jednostronnie lub dwustronnie, produkty te stosowane są do termoizolacji dachów, podłóg, tarasów, itp.

Mogą być stosowane na powierzchniach:

- betonowych
- płaskich
- z zaprawy cementowej
- blach trapezowych
- istniejących pokryciach dachowych

Standardowe wymiary płyty 1000x1000.

Na zamówienie wykonujemy płyty o dowolnej grubości.

KSZTAŁTKI DACHOWE I STYROPIAN SPADKOWY

Kształtki i kliny nielaminowane i laminowane papą podkładową, produkty te stosowane są do wykończenia dachów, kominów, itp.

Wykonujemy dowolne kształtki o wodolnych wymiarach.

OTULINY

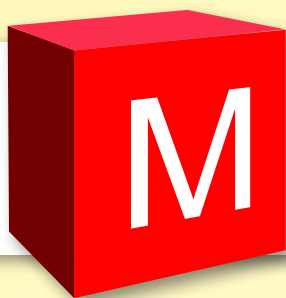

Otuliny rur - przeznaczone do izolacji rur służących przesyłaniu cieczy, zarówno o temperaturze dodatniej, jak i ujemnej.

Otuliny na życzenie pokrywamy tynkiem polimerowym.

STYROPIAN DO OCIEPLEŃ

- Styropian EPS 70-040 - elewacja
- Styropian EPS 100-038 - dach/podłoga
- Styropian EPS 200-036 - fundament/podłoga/parking
